### Una fiera eredità

La nostra azienda ebbe inizio nel lontano 1900, quando Angelo Rocca fondò una delle prime aziende italiane specializzate nella fabbricazione manifatturiera del palloncino. Angelo iniziò a vendere i suoi palloncini in Europa, Africa e nel Medio Oriente. A quel tempo, la produzione avveniva su piccola scala in quanto era tutto realizzato a mano.

Nel 1972 Genesio, il figlio di Angelo Rocca, trasformò l'azienda, portandola da una piccola realtà manifatturiera alla produzione di scala industriale. Nel 1977, Angelo, figlio di Genesio, prese le redini dell'azienda e fondò nel 1990 Gemar srl. Questa combinazione di abilità, competenze, retaggio e tecnologia tramandata per oltre 4 generazioni, includendo adesso Genesio - figlio di Angelo - è ciò che rende Gemar veramente unica.

Una tradizione tramandata da quattro generazioni.

### A proud heritage

Our company began way back in 1900, when Angelo Rocca founded one of the first Italian companies specialising in balloon craftsmanship. He began to sell his balloons across Europe, Africa and the Middle East. At this time, production was on a small scale as everything was made by hand.

In 1972, Angelo's son Genesio transformed the company, taking it from an artisan outfit to industrial scale production. In 1977, Angelo, son of Genesio took over the reins and in 1990 founded Gemar Limited. The combination of skills, expertise, heritage and technology that has been passed over 4 generations, now including Genesio, son of Angelo, is what makes Gemar truly unique.

A tradition passed on over four generations.

GEMAR balloons are made of biodegradable natural rubber latex.

\*Average flying time for helium filled latex balloons.

Environmental conditions, helium quality, filling and use of the products may vary beyond our control.

Therefore these specifications are to be considered as a guideline and no performance guarantee can be made.

Metallic balloons are slightly smaller due to their latex composition and average flying time is reduced in proportion to the actual size.

We recommend to pre-stretch the balloons before inflating with gas. Inflate the balloon with air 2 times before inflating with helium or balloon gas.

**Tips:**

While using a helium tank and the content of helium decreases the filling pressure will also go down to a certain extent that the balloons cannot be filled properly. In this case we recommend to pre-stretch the balloons by inflating at first with air and then to proceed to inflate with helium so the balloon is less resistant and less pressure is required to fill the balloon properly.

We recommend the use of **ULTRA HIFLOAT** for helium filled balloons.

**ULTRA HIFLOAT** balloon flight extender can increase the flying times of latex balloons up to 25 times longer than untreated balloons.
