Products

ibrex™
 ibrex offer amazing float times.
 It will float and maintain the shape-
 over 30 days.

IP
 IP means Inside Printing. It is printed
 from the inside. Even if it gets wet with
 water or rain, the ink won't come off.

AQUA BALLOON™
 Aqua Balloon has outstanding transparency, gloss and resilience.
 It is extremely soft and pleasant to touch.

UPRIGHT BALLOON
 Upright Balloon is an innovative new
 shape balloon that tightly stands
 on its own, just by inserting the stick/
 straw and inflate by the air.

Wrap around Friends
 Wrap around Friends is a cute design
 wrapped around your arm.
 The ink is IP, so the ink won't come off.

ibrex™

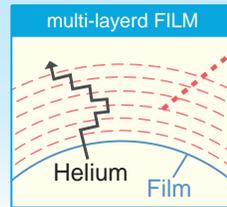

Made by HIGH GAS BARRIER FILM

Floating the longest time in the World!!

ibrex™ balloons offer amazing float times. It will float over 30 days and maintains the shape for 30 days!! It's means that you can save Helium Gas and ECO Friendly!

ECO Friendly!
You can save the Helium Gas ♡

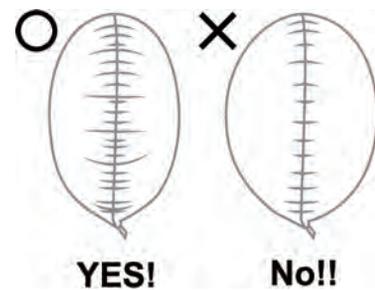

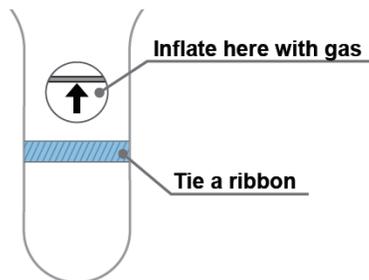

Float over 30 days!!

((Inflation Instructions))

IMPORTANT : Use a foil regulator Only

1. DO NOT use a latex regulator to inflate ibrex balloons!
2. A Foil regulator automaticcally inflates ibrex balloons to the perfect pressure and size with wrinkle.
3. DO NOT inflate too much and by high pressure ibrex balloons,organization will be broken,and dosen't work High Barrier performance.

Balloon Care:

- A foil balloon can appear deflated in cold air, but it will fill out when warmed up.
- DO NOT expose foil balloons to extreme heat or they can burst.
- Balloons float differently depends on altitudes. The lift ability may decrease under higher altitudes
- Do Not release helium-filled FOIL BALLOONS outdoors

* Foil Balloons are **NOT Biodegradeable**. * Foil Balloons can **cause power outages**.

* IBREX 气球提供惊人的飘浮时间。 其将飘浮 30 天以上且保持形状 30 天! 这意味着您能够节约氦气并且更加环保!

< 充气方法 >

要点：请使用铝箔气球专用打气筒。

- * 不可使用橡胶气球打气筒充大 Ibrex 气球!
- * 铝箔气球专用打气筒能够以适当压力自动充大 ibrex 气球至合适大小。
- * 不可过度充大：否则在高压下薄膜组织将被破坏，发挥不了高效气体阻隔性能

< 气球养护 >

- * 铝箔气球在冷空气中可能会变瘪，但空气变暖后将重新胀起。
- * 请勿将铝箔气球暴露于高温下，否则有可能爆裂。
- * 请勿在户外放飞充满氦气的铝箔气球，否则可能导致电力故障。
- * 铝箔气球不可降解。

* IBREX 氣球提供驚人的飄浮時間。 其將飄浮 30 天以上且保持形狀 30 天! 這意味著您能夠節約氦氣並且更加環保!

< 充氣方法 >

* 要點：請使用鋁箔氣球專用打氣筒。

- * 不可使用橡膠氣球打氣筒充大 Ibrex 氣球!
- * 鋁箔氣球專用打氣筒能夠以適當壓力自動充大 ibrex 氣球至合適大小。
- * 不可過度充大：否則在高压下薄膜組織將被破壞，發揮不了高效氣體阻隔性能。

< 氣球養護 >

- * 鋁箔氣球在冷空氣中可能會變癟，但空氣變暖後將重新脹起。
- * 請勿將鋁箔氣球暴露於高溫下，否則有可能爆裂。
- * 請勿在戶外放飞充滿氦氣的鋁箔氣球，否則可能導致電力故障。
- * 鋁箔氣球不可降解。

* ลูกโป่ง IBREX สามารถลอยได้นานจนคุณตะลึง มันลอยได้นานกว่า 30 วัน และยังคงรูปเดิมได้ 30 วัน !! ทำให้คุณประหยัดแก๊สฮีเลียมและเป็นมิตรต่อสิ่งแวดล้อม !

< คำแนะนำในการสูบลมลูกโป่ง >

- * สิ่งสำคัญ: ให้ใช้เครื่องวัดแรงดันชนิดที่ใช้กับลูกโป่งพอดีเท่านั้น
- * ห้าม ใช้เครื่องวัดแรงดันชนิดที่ใช้กับลูกโป่งยางหรือสูบลมลูกโป่งของ Ibrex!
- * เครื่องวัดแรงดันลูกโป่งพอดี จะอัดลมลูกโป่ง Ibrex ด้วยแรงดันสูงโดยอัตโนมัติ เพื่อให้ได้ขนาดที่เหมาะสม
- * ห้ามอัดลมมากเกินไป: การอัดลมด้วยแรงดันสูง จะทำให้โครงสร้างของลูกโป่ง Ibrex เสียหายได้ และจะไม่สามารถป้องกันการซึมผ่านของแก๊สได้

< คำแนะนำในการสูบลมลูกโป่ง >

- * ลูกโป่งพองดีอาจจะแบนลงได้ถ้าอยู่กลางแจ้ง แต่จะพองขึ้นมาเองเมื่ออากาศอุ่นขึ้น
- * ห้าม ให้นำลูกโป่งพองดีไปตากแดดหรือตากไฟ เพราะอาจระเบิดได้
- * ห้าม ปลดลมลูกโป่งที่เติมแก๊สฮีเลียมลอยออกไปในอากาศ เพราะอาจทำให้เกิดกระแสไฟฟ้าขัดข้อง
- * ลูกโป่งพองดีไม่สามารถย่อยสลายได้ด้วยตัวเอง

*IBREX-Balloons sind aussergewöhnlich lange haltbar. Sie haben eine Schwebzeit von über 30 Tagen und bleiben in Form.

Das bedeutet Sie sparen Helium und sind Öko-freundlich!

< Instruktionen zur Befüllung >

* **WICHTIG!** Benutzen Sie professionelle Folienballonarmaturen.

- * Benutzen Sie KEINE Latexarmaturen um IBREX Ballons zu Befüllen.
- * Automatische Folienballonarmaturen befüllen die Ballons mit perfektem Druck um die gewünschte Größe zu erreichen.
- * Befüllen Sie die IBREX-Balloons nicht zu groß oder mit viel Druck, da dann die empfindliche Barriere Folie beschädigt werden kann.

< Ballon Service >

- * Ein Folienballon wird bei kalter Luft kleiner. Sobald Sie dann wieder in wärmere Luft kommen, wird der Ballon dann wieder die ursprüngliche Größe annehmen.
- * Setzen Sie Folienballons keiner extremen Hitze aus, da sie dann platzen würden.
- * Lassen Sie im Aussenbereich "KEINE" Folienballons steigen.
- ** Folienballons sind nicht biologisch abbaubar. **Folienballons können Stromausfall verursachen.

*IBREX-ballonnen hebben verbazingwekkende zweeftijden. Ze blijven meer dan 30 dagen zweven en behouden 30 dagen hun vorm ! ! Het betekent dat je helium kan besparen en goed zijn voor het milieu!

< Hoe opblazen ? >

*Belangrijk: gebruik alleen een ontspanner voor folie !

- *Gebruik geen latex ontspanner om Ibrex ballonnen op te blazen !
- *Een folie-ontspanner blaast automatisch de Ibrex ballonnen op met de juiste druk tot de juiste maat.
- *Blaas de ballon niet te groot op : bij hoge druk wordt de structuur van de Ibrex-ballonnen gebroken en werkt de High Performance Barrier niet.

< Zorg voor de ballon >

- *Een folieballon kan leeggelopen lijken in koude lucht, maar zal zich herstellen als hij in een warmere omgeving komt.
- *Stel folieballonnen dus niet aan extreme hitte bloot want daar zijn ze uiteraard niet tegen bestand
- *Laat geen met helium gevulde folieballonnen buitenshuis los, omdat ze stroomuitval kunnen veroorzaken als ze een hoogspanningslijn raken .
- *Folieballonnen zijn niet biologisch afbreekbaar

*Les ballons IBREX offrent des temps de flottaison étonnants. Il flotte pendant 30 jours et conserve sa forme pour 30 jours !! Cela signifie que vous pouvez économiser du gaz hélium et être respectueux de l'environnement!

<Instructions à gonfler>

*Important : n'utilisez qu'un détendeur de ballons foil !

*Ne pas utiliser un détendeur latex pour gonfler les ballons Ibrex !

*Un détendeur foil gonfle automatiquement les ballons Ibrex à la bonne pression et à la bonne taille.

*Ne pas gonfler trop grand : à haute pression, la structure des ballons Ibrex se briserait et la barrière haute performance ne fonctionnerait pas.

<Soin des ballons>

*Un ballon foil peut sembler dégonflé à l'air froid, mais il se remplira lorsqu'il sera réchauffé.

*Ne pas exposer les ballons foil à une chaleur extrême, car ils peuvent éclater.

*Ne pas lâcher de ballons foil remplis d'hélium à l'extérieur, car ils peuvent provoquer des pannes de courant.

*Les ballons foil ne sont pas biodégradables.

*Los globos IBREX ofrecen tiempos de flotación increíbles. ¡Flotará manteniendo su forma durante 30 días!! Esto se traduce en un ahorro de helio y en un impacto medio ambiental ECO Friendly !

<Instrucciones de inflado>

*IMPORTANTE: Use solo el regulador específico para los globos de foil.

*¡NO use un regulador de globos de látex para inflar globos de foil Ibrex!

*Un regulador para globos de foil inflará con la presión y el tamaño exacto los globos de foil Ibrex.

*NO infle demasiado los globos de foil Ibrex; porque la presión del helio romperá la estructura interna del globo haciendo que pierda su capacidad de vuelo en el tiempo.

<Cuidado del globo>

*Los globos de foil, con el frío pueden parecer desinflados, pero volverán a su tamaño original apenas entren en contacto con la temperatura ambiente.

*NO exponga los globos de foil al calor extremo ya que pueden explotar.

*NO suelte globos de Foil llenos de helio al aire libre, ya que pueden causar cortes de energía.

*Los globos de foil NO son biodegradables.

* I palloni IBREX si mantengono in volo per molto tempo. Possono avere la stessa qualità di gonfiaggio e forma anche dopo 30 giorni! Questo è un ottimo modo per risparmiare elio ed essere Eco Friendly!

<Istruzioni per il gonfiaggio>

* IMPORTANTE: Utilizzare la valvola del foil.

* NON utilizzare la valvola del lattice per gonfiare i palloni Ibrex!

*Con la valvola per foil il palloncino si gonfierà perfettamente e con la giusta pressione.

* NON gonfiare troppo e con alta pressione i palloncini Ibrex.

<Cura del palloncino>

*Un pallone in foil potrà leggermente sgonfiarsi se esposto ad aria fredda per poi riprendere la sua forma originale non appena riportato alla giusta temperatura.

* NON ESPORRE i palloncini in foil a temperature troppo alte, potrebbero scoppiare.

* NON RILASCIATE nell'ambiente esterno i palloni in FOIL gonfiati a elio.

** I palloni in foil NON sono Biodegradabili.

** I palloni in foil possono causare corti circuiti se portati a contatto con fili di alta tensione.

* Balony IBREX unoszą się niezwykle długo. Unoszą się ponad 30 dni, zachowując przy tym swój kształt!! Oznacza to że zaoszczędzisz hel, co jest przyjazne dla środowiska!

<Instrukcja nadmuchiwania>

* IMPORTANTE: Utilizzare la valvola del foil.

* UWAGA: używać wyłącznie reduktory z końcówką automatyczną. NIE używać reduktorów do balonów lateksowych!

*Reduktor z końcówką automatyczną pompuje balony pod odpowiednim ciśnieniem do odpowiedniego kształtu.

* NIE pompować balonów zbyt mocno, może to uszkodzić unikalną strukturę balonów Ibrex, a wtedy specjalna bariera dla helu przestanie działać.

<Postępowanie z balonami>

*Balon przeniesiony do chłodnego miejsca będzie się wydawał zwiędnęty, ale odzyska kształt po powrocie do ciepłego pomieszczenia.

* NIE przenosić balonów do gorącego pomieszczenia, może pęknąć.

* NIE wypuszczać balonów foliowych do atmosfery, mogą spowodować spięcie linii energetycznych.

* Balony foliowe NIE są biodegradowalne.

Drawing Explanation Of Balloon

Indication Of Inflation

How to inflate

We recommend using special inflator of film balloons.

As shown, please inflate with Helium or Air slowly from balloon mouth (valve). If you inflate with strong pressure, it will lead to broken of valve. Also please be careful that valve is not to be bent when you inflate.

How to Moor

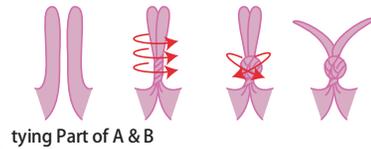

Join the balloons in the same direction, Please set and inflate only the last balloon tying Part of A & B downward so that you can tie with the cord of mooring.

How to tie

As shown, twist from the base of tying parts of A and B first, and tie them together. Cut the rest tying parts of A and B.

Length chart of Single chain

● Double-sided tape

[Cautions in handling the Three-Point balloon]

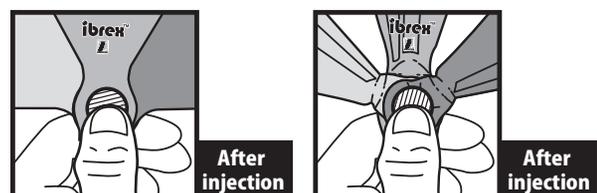

(1) Cautions when connecting balloons *When connecting 3 balloons

As shown in the figure, align the balloons so that the connecting points (film valves) are aligned and piled on top of each other.

Be careful not to have two connecting points (film valves) as shown in the figure, otherwise it won't possible to inject gas.

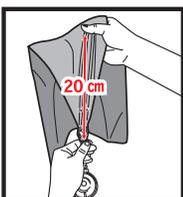

The above cautions apply before injecting gas. After injecting the gas, it is not a problem if two or more connecting points (film valves) are placed on top of each other.

Forcefully push down on the polyolefin (double-sided tape) as shown in the figure to prevent the connecting point being detached.

[Cautions in handling the Three-Point balloon]

(2) How to inject gas with the precision inflator (low-pressure injection device)

When injecting gas with the precision inflator (low-pressure injection device), pull upwards while holding them approximately 20 cm away from the inlet (film valve) as shown in the figure.

As for the spec of these balloons, please refer to the chart in the last page.

Aqua Balloon

AQUA BALLOON™

Features

Aqua Balloon has outstanding gloss, resilience and expandability and becomes an almost perfect sphere when inflated.

The film surface retains transparency.

It is extremely soft and pleasant to touch.

You can heat-seal Aqua Balloon above the cover film.

Wide (mm)	470	330	235	125	70
Code	0201 32 0012	0201 32 0014	0201 32 0011	0201 32 0010	0201 32 0013
Wide (inch)	19	13	9	5	3

<Guide to sizes when inflated / Recommended Inflating Devices> ★ indicates products that float.

Aqua Balloon Size	Minimum	Maximum	Recommended device	Cautions
470mm	★650mm	★800mm	Air Force 4™ Inflator	For inflating, use the device with fast inflating speed. Inflating with a low-speed device (handpump or mini blower) could cause the balloon to lose its left-right balance.
330mm	★380mm	★600mm		
235mm	★270mm	★420mm		
125mm	130mm	★230mm	Handpump or mini blower	For inflating, use the device with slow inflating speed.
70mm	75mm	130mm		

Tips about inflate

- If the Left-Right Balance of Aqua was lost when you inflate, Please inflate up to Maximum Size and then Deflate to your size. It will improve this issue.
- The barrier characteristics of helium gas in the Aqua Balloon are no different from those in rubber balloons. If inserting a rubber balloon into the Aqua Balloon and floating for a long time, please use HIFLOAT®.

« Guide to Gas Capacity /Lift ability »		Flat size (inch)	Recommended Minimum size (mm)	Recommended Minimum size (inch)	Lift ability	Gas capacity	Recommended Maximum size (mm)	Recommended Maximum size (inch)	Lift ability	Gas capacity	Body weight Without cover film

01
New shape for firm self-standing!

02
Simply insert the stick and inflate!

03
The stick is fixed by the power of air alone!

When you use a stick or straw, please note the following point.

Please use a cylindrical stick.

Please use a stick with diameter less than 6 mm.

(The method of assembling differs according to the diameter.)

For details, refer to "How to use Upright balloon" below).

Metallic Gold

5" 0201 80 0507

Metallic Light Blue

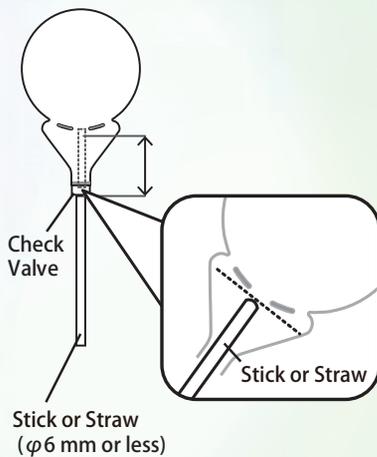

5" 0201 80 0508

Metallic Ivory

How to use Upright balloon

※ Insert the stick "before inflate"

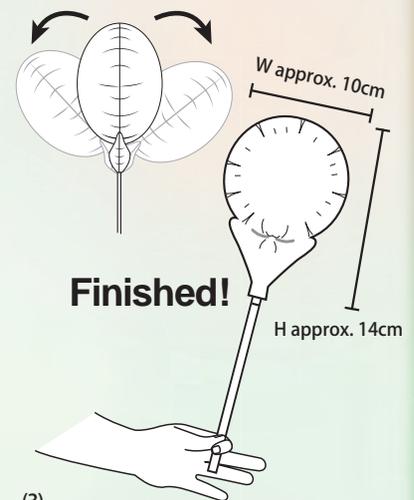

(1) Slowly insert the stick to the position shown in the diagram, making sure that the dual-structure check valve isn't damaged.

Be careful not to insert too far, otherwise the valve will cease functioning and cause the air to leak.
Be careful not to insert the stick after inflating the balloon, otherwise this could cause the check valve to break.

(2) Slowly insert air up to the size of the wrinkles in the figure, making sure that the stick doesn't detach from the balloon.

If you want to rapidly insert air, provisionally fix the check valve and stick with tape as shown in the figure.
If using a thin stick with diameter of no greater than 4 mm, since the balloon is likelier to detach, it is recommended to fix the check valve and stick with tape.

(3) Lightly bend the balloon back and forth as shown in the figure until it stands upright.

Be careful not to forcefully pull the stick from the balloon, otherwise this could cause the check valve to break.

The Upright Balloon is a revolutionary new shape of balloon can be stood itself simply by inserting a stick or straw and inflated by air. Since it doesn't require a separate "cup" as in conventional air filled balloons, work efficiency is dramatically improved!
